

Instrument Site Support Engineer

Job Type: Full Time (Mon – Fri), Permanent

Location: Aberdeen

PBS (Semco UK) are looking for an Instrument Site Support Engineer to join our team on a full-time, permanent basis. Integrated into the smart room team, the Instrument Site Support Engineer works in collaboration with the Client team.

Details/Duties:

- Provide day-to-day discipline support for the Platform/site.
- Solve technical issue submitted by the site in the short term
- Maintenance of close links with Technical Authorities to ensure that system integrity is preserved.
- Ensuring that all planned work scopes are identified and included in short and long-term asset plans
- Challenging maintenance activities and applying risk-based techniques to optimise maintenance activities and periodicities
- Ensuring that instrument operations performed in accordance with good discipline practices and procedures
- Assist GMOC Site Rep and Offshore Supervisor to resolve instrumental equipment problems
- Coordination of vendor requirements to support discipline equipment planned and corrective maintenance activities
- Maintaining close liaison with reliability engineers and other Tier 2/Onshore Instrument Engineer to support reliability improvement programmes, RCM analyses and maintenance strategy development
- Participation in RCA processes and investigations
- Assist in performance of equipment maintenance and spares reviews
- Ensuring satisfactory close out of all actions identified in all work scopes
- Proactive in supporting and promoting HS&E processes and requirements
- Knowledge and understanding of CMMS (UNISOL)
- Regular liaison with key stakeholders to review and update discipline content in SAP
