

Offshore Instrument Technician

Job Type: Full-time 3/3/3/4 Rotation

Location: Central North Sea

PBS (Semco UK) are looking for an Offshore Instrument Technician in the Oil and Gas industry.

Responsible for the availability and reliability of all computer control systems, telecommunications systems, Fire and Gas systems, Shutdown systems and related instrumentation. This is done in accordance with legislative requirements, company health, safety, environmental, integrity and other relevant standards and company values.

Decision making ability is in accordance with delegation of authority

1. Actively support a working environment based on respect for health, safety and environmental issues and maintenance of a high level of asset integrity.
2. Participate as a member of the Instrument Supervisor's team in delivering performance against targets
3. Build effective working relationships with other departments and shifts.
4. Maintains emergency shutdown equipment.
5. Responsible for completing verification assurance and maintenance routines and maintaining quality records.
6. Carries out fault finding and repairs on communications, control and instrument systems, whilst observing and complies with safety rules and regulations, including the permit to work system.
7. Act as nominated person responsible for small bore tubings and fittings (RTP) as directed.
8. Provides a source of technical expertise to operate, fault find and maintain the process control systems, ensuring that all planned maintenance is completed on the equipment for which they are responsible.
9. Liaises with the relevant onshore support engineer and vendor reps to ensure that the
