

Senior Project Engineer/Delivery Lead

Job Type: Full-time (Mon-Fri), Permanent
Location: Aberdeen

Details/duties:

- Overall management and administration of a portfolio of modification projects in all project phases: concept, study, detailed design, construction, and commissioning.
- Ensuring that assigned projects are delivered to agreed budgets, schedules and acceptable quality.
- May be assigned to a Delivery Lead role either on full-time basis, or part-time, alongside management of assigned modification projects.
- Maintain and develop strong relationships within the customer organisation
- Responsible for development of proposal documents for assigned scopes, including developing narratives, co-ordination of discipline input to CTRs, total cost estimate and schedule.
- Accountable to PBS and client management for project reporting including weekly reporting, onshore readiness, action tracking, cost reports, schedules, change orders, cost reports, planning, supplier invoice clearance for payment.
- Leadership and co-ordination of all project resources, and management of interfaces between the various disciplines including: engineering disciplines, procurement, quality, planning, HSE, construction onshore, logistics, maintenance, vendors and suppliers, ICP.
- Promoting excellent HSE behaviours and performance, and compliance with all policies and processes
- Supervision of junior & trainee project engineers
- Other duties as assigned by the Engineering and Construction Department Manager
- Applicable for Delivery Lead, in addition to above:
 - Delivery Lead is accountable to E&C and Client management for all modifications on a specific asset or asset group i.e. including those modifications assigned to other PEs.
 - May have line management responsibility for other PEs.
 - Alternatively, as Engineering Delivery Lead, will work in conjunction with the engineering discipline leads to ensure the smooth running of the Engineering function

Experience & Requirements:

- Proven work experience in a similar position within the O&G or related industries.
- Education: Bachelor's degree preferred
- Training / Certification: Project Management qualification preferable
- Strong Communication Skills
