

Lead Instrument Engineer

Job Type: Full-time (Mon-Fri), Permanent
Location: Aberdeen

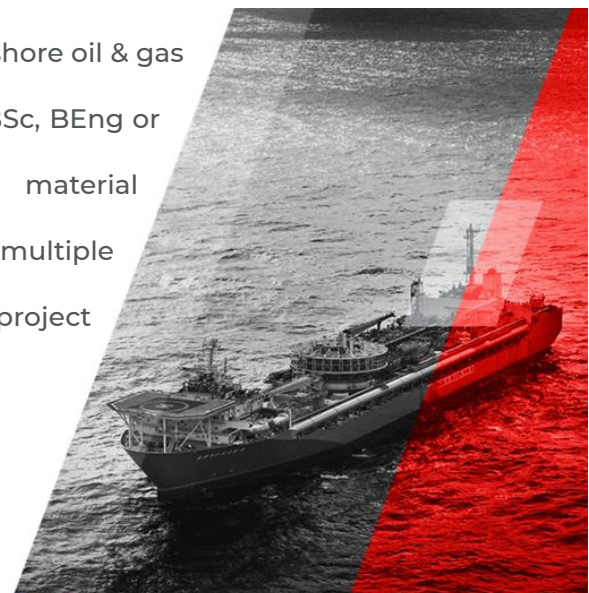

PBS (Semco UK) are looking for a Lead Instrument Engineer to join our team. Main responsibility is to deliver brownfield modification deliverables for assigned work in accordance with the applicable procedures and standards within the man hour and cost budgets and the project schedule targets. You will have a minimum of 10 years' relevant experience working in a UKCS brownfield modification environment.

Details/duties:

- In this role, you are accountable for management of the Instrument engineering discipline reporting to the project & engineering manager.
- Maintain technical integrity & design accuracy ensuring work is completed in accordance with relevant codes, standards and procedures.
- Supervision of discipline engineers and designers
- Approval, checking and preparation of design/engineering documentation
- Provide technical assistance to business development strategies, activities, and initiatives.
- Provide discipline input to project plans and reporting progress
- Undertake training of less experienced engineers, including duties as a mentor.
- The ideal candidate will have demonstrable experience as a lead engineer in brownfield Concept, FEED and Detail Engineering projects and are able to deliver the scope on a project on time and within budget.

Qualifications/Experience required:

- Brownfield modification experience in onshore and offshore oil & gas environments is essential.
- MSc, MEng or equivalent professional qualification or BSc, BEng or equivalent with relevant experience.
- Experience preparing engineering man-hour and material estimates.
- Ability to work efficiently and effectively managing multiple tasks and projects.
- Must be self-motivated, flexible, able to work to project schedules.
