

Lead Technical Safety Engineer

Job Type: Full-time (Mon-Fri), Permanent
Location: Aberdeen

PBS (Semco UK) are looking for a Lead Technical Safety Engineer to join our team.

Details/duties:

- Organise, plan and coordinate the Technical Safety engineering activities of studies and modification projects (RFM), in conjunction with the other technical leads, project management and construction.
- Establish relationships with Consultants for provision of engineering services, and management of specialist Technical HSE engineering software requirements.
- Study Lead for single discipline and Technical Safety led multidiscipline studies; originator of Statement of Requirements, Basis of Design and other principal technical documents.
- Preparation of discipline engineering manhour estimates, and review and approval of estimates developed by Engineering Consultants
- Assign originators for deliverables from the technical safety team
- Quality assurance of all discipline engineering deliverables, including review and approval of Engineering Consultants and other 3rd party specialists.
- Mentoring and other professional development activities in support of discipline engineering staff
- Responsible for the timely preparation, check, approval and delivery of all required technical safety engineering deliverables.
- Any other duties as required by Head of Projects and Engineering and Senior Management

Qualifications/Experience required:

- Experience in a similar position
- Workshop facilitation experience preferred, e.g. HAZID, Risk Assessment, Design Review etc.
- Experience of organising, attending and management of hazards and actions from HAZID, HAZOP and SIL workshops
- Development of Technical Safety drawings such as Hazardous Area Classification, Escape Route, Safety Equipment etc.
