

Dear Candidate,

All Connected Competence employers, which Ponticelli UK and Semco Maritime are – both independently, and as part of the PBS consortium) - require their Electrical Technicians – Installation, to verify their competence through Connected Competence technical tests.

Do you have the technical tests you need for mobilisation?

**The tests shown below are a pre-employment requirement for Connected Competence employers:**

<b>TIE04</b> Install Electrical Distribution Final Systems	Book the tests you need with one of the centres below, which can provide industry-funded vouchers – <i>meaning that you will not be charged for taking any of these tests.</i>
<b>TIE08</b> Installing AC Electrical Motors	<b><u>ABERDEEN</u></b>  <b>AFST</b> T: 01224 973900 E-mail: <a href="mailto:training@afst.uk.com">training@afst.uk.com</a>  <b>Tullos Training</b> T: 01224 872316 E-mail: <a href="mailto:g.burnett@tullosttraining.co.uk">g.burnett@tullosttraining.co.uk</a>  <b>3T</b> T: 0330 202 0569 E-mail: <a href="mailto:booktraining@3tglobal.com">booktraining@3tglobal.com</a>
<b>TIE15</b> Installing Support Systems	
<b>*TIE16</b> Installing cables in an Intrinsically Safe System (or CompEx equivalent)	<b><u>EXETER</u></b>  <b>The Focus Training Group</b> T: 01392 829 100 E-mail: <a href="mailto:marisa.d@tftg.org">marisa.d@tftg.org</a>
<b>TIE17 / *TIE17(Ex)</b> Install, Gland and Terminate Power Cables (or CompEx equivalent)	<b><u>NEWCASTLE</u></b>  <b>3T</b> T: 0330 202 0569 E-mail: <a href="mailto:booktraining@3tglobal.com">booktraining@3tglobal.com</a>

\*A valid CompEx certificate covering modules 1-4 is accepted as demonstrating equivalent competence and full dispensation would be applied for the specific test.

Through industry-recognised, standardised testing, **Connected Competence** assures an ongoing base level of technical competence for workers across the engineering construction industry to create a **safer**, more **competent** and **transferable** workforce across sectors.

Visit the **Connected Competence** [website](#) and [watch the video](#) below for more information:

[Connected Competence in a nutshell](#)

**Connected Competence** is industry-led, enabled by the ECITB, and supported by Operators, Employers, HSE, OEUK, NSTA, Step Change in Safety, Scottish Government, RMT, GMT and Unite the Union.

### These organisations all support Connected Competence

(as at Sep 2024)

## ROLE PROFILE: ELECTRICAL INSTALLATION

<b>Occupational Area:</b>	Asset/Site – Installation Electrician
<b>Job Role Examples:</b>	Electrical Installation Technician or Electrician
<b>Role Overview:</b>	
<p>Installation Electricians are responsible for the installation, inspection, testing, commissioning and diagnosis of faults in electrical plant and its associated cabling and equipment. These activities are typically undertaken on equipment such as electrical distribution systems, generators, electric motors, HVAC (Heating, ventilation and air-conditioning) systems. To achieve these functions the Installation Electrician must be able to interpret technical specifications and drawings and, where necessary demonstrate the effective use of reasoning skills in the resolution of faults and problems. Whilst Installation Electricians are required to use specialist tools and equipment, they also routinely use traditional hand tools and test equipment during the execution of their duties. Installation Electricians undertake these tasks on sites such as petrochemical plants, upstream and downstream oil and gas installations, power generating plants, chemical plants and food processing and other processing plants, which often necessitates them working in hazardous conditions. Installation Electricians will be expected to be trained and competent in conducting LV isolations and switching, and adequate training in the relevant current IET Regulations.</p>	
<b>Knowledge &amp; Skills:</b>	
<p>The Installation Electrician will:</p> <ul style="list-style-type: none"><li>• Have the required competencies to install, inspect, test, commission and diagnose faults in electrical plant and its associated cabling and equipment to the required standard while adhering to health, safety and environmental regulations and safe working practices, and taking into account environmental and sustainability considerations.</li><li>• Understand the relevant legislative, regulatory and local requirements or procedures and safe working practices, including their responsibilities with regards to reporting lines and procedures.</li><li>• Understand the preparation and reinstatement requirements in respect of the work area, materials and equipment, and the possible consequences of incorrect actions in these areas.</li><li>• Be able to read and interpret relevant engineering drawings, related specifications, quality standards and equipment manuals, and to follow work instructions and relevant plans and schedules.</li><li>• As necessary, put forward suggestions and develop modification requests to improve plant/equipment efficiency/safety of operations.</li><li>• Understand which tools and equipment to use and know when these are required. Relevant training and taught techniques should be demonstrated to ensure compliance to safety procedures and quality control at all times.</li><li>• Understand their responsibilities for ensuring the care and security of tools and equipment used.</li><li>• Understand types of defects and faults that can occur, how to identify them, and what action to take.</li><li>• Be able to handle a range of digital information, technology and equipment to support work related tasks and to communicate information.</li></ul>	
<b>Technical Competencies:</b>	
<p><b>TIE04 - Install Electrical Distribution Final Circuits-</b> safely isolate a Three Phase Distribution Board, install single &amp; three phase final circuits, and carry out suitable 'Dead' Tests using appropriate materials, equipment, tools and techniques.</p> <p><b>TIE08 - Installing AC Electrical Motors</b> - Install suitable cables, terminate and test a three-phase motor, using appropriate materials, equipment, tools and techniques.</p>	

**TIE15 - Installing support systems** - measure, cut, shape construct, and install a cable support system to specification. Construct and install a cable support consisting of tray and channel components to specification

**\*TIE16 - Installing cables in an Intrinsically Safe system** - select, gland & terminate industrial type cable into an Intrinsically Safe installation, and safely follow the installation Loop drawing.

**TIE17 / \*TIE17(Ex) - Install, Gland and Terminate Power Cables** - Select, gland & terminate industrial type cables (E.g., Braid and SWA) to a suitable component (E.g., Junction Box) and associated cable tray in line with details on the appropriate specification.

*\*A valid CompEx certificate covering modules 1-4 is accepted as demonstrating equivalent competence and full dispensation would be applied for the specific test.*

#### **Behaviours:**

- Establish and maintain effective working relationships, communicate effectively, and work inclusively to deliver work within given specifications.
- Demonstrate team working skills and interact with team members in a positive and professional manner.
- Work within an overall risk control strategy which has been developed by safety specialists and includes detailed criteria for identifying risks, together with clearly defined procedures for action which must be followed.
- Take personal ownership of, and responsibility for, completing tasks and procedures. Follow procedures and relevant codes of conduct with integrity and rigour and complete actions and documents accurately and honestly.
- Take responsibility for identifying and reporting instances where procedures or work instructions cannot be met or where a variation in them is required.
- Deal promptly and effectively with problems within their control and report those that have been, and those that cannot be, solved.
- Take responsibility for supervising and mentoring others where appropriate.
- Demonstrate the ability to coordinate work scopes and SIMOPS (Simultaneous Operations) effectively within a wider team, as required.
- Demonstrate effective handover of responsibility and equipment at the end of a task.
- Take responsibility and ownership of personal development, set targets to plan on how these will be achieved.
- Support operational requirements, achieve targets and maintain records as required, thereby minimising backlog and downtime.
- Maintain compliance with legislative requirements and company policies, procedures and standards.
- Maintain and demonstrate ongoing technical competence and skill set to current standards and updates.
- Support innovation and development for improvements.

#### **Determining Work Scopes:**

Other categories of workers may be mobilised to complete certain stand-alone activities/work scopes within the electrical installation discipline. Relevant technical tests for those workers are identified below:

- Ex Inspection – Test reference **TIE17 / \*TIE17Ex** Install, Gland and Terminate Power Cables
- Ex Inspection – Test reference **\*TIE16** Installing cables in an Intrinsically Safe system

Although appropriately qualified for these specific work scopes, it should be noted that without the full suite of electrical installation tests the person should not be deemed as demonstrating full 'currency of competence' across the electrical installation discipline.

## SUPPORTING NOTES: ELECTRICAL INSTALLATION

The Connected Competence standard role profile for an electrical installation technician sets out the knowledge, skills, technical competencies and behaviours that are expected from a fully competent electrical installation technician in any sector of the Engineering Construction Industry. Once competence is first achieved through training and subsequent qualification, **regular testing** ensures that **ongoing** competence is maintained, against a recognised standard.

This supporting document highlights transferable qualifications and any additional technical requirements that maybe specific to a certain sector to support standardisation of skills and workforce transferability. It does not reference any site-specific or sector specific safety training.

### Sector Specific Qualifications

Prior to embarking on the formal technical test assessment cycle, an individual would be expected to have core trade qualifications as a minimum requirement:

Key
Accepted - Applicable qualification for the role with no gap analysis required
Recognised - Applicable technical content, however a gap analysis maybe required for appropriate unit completion
Dependant on Employer - May or may not be recognised

Qualification Details	Offshore Oil & Gas	Onshore Oil & Gas	Wind	Nuclear
L3 SVQ/SCQF6 in Installation and Commissioning				
L3 Diploma in Installing Engineering Construction Plant and Systems - Electrical Fitting OR Installing and Commissioning Electrical Systems (Plant) and Equipment				
L3 NVQ, SCQF7 in: Installing Engineering Construction Plant and Systems – Electrical				

### Additional Technical Competence requirements

Given the hazardous nature of some Engineering Construction working environments, the overall risk control strategy for the organisation will usually require electrical installation technician to be familiar with, and work within, a formal Permit to Work system. Compliance with a specific company or site safety management system (SMS) will also usually be required and additional 'site-specific' technical competence will be developed on top of basic technical competence assurance. Specialist safety training may also be required as a prerequisite in addition to role specific training.

Oil & Gas	Wind	Nuclear	CCUS	Hydrogen
<ul style="list-style-type: none"> <li>Verify vendor installed plant and equipment for safety and operational integrity.</li> </ul>	<ul style="list-style-type: none"> <li>Refer to Wind Turbine Technician Cross Skill Programme</li> </ul>	<ul style="list-style-type: none"> <li>Verify vendor installed plant and equipment for safety and operational integrity.</li> <li>'Ex' not required for TIE17</li> </ul>	<ul style="list-style-type: none"> <li>No additional technical competencies</li> </ul>	<ul style="list-style-type: none"> <li>TIE08 not required</li> </ul>
